

WALID GUEDDARI

Full-Stack Software Engineer | React / Node.js / TypeScript | AI-Assisted Development (Claude Code)

Monastir, Tunisia | +216 97 488 241 | walid.gueddari@polytechnicien.tn | [Portfolio](#) | linkedin.com/in/walidgueddari | github.com/welidwg

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience shipping production web and mobile applications, specializing in React.js, Next.js, Node.js/TypeScript (Fastify, Express.js), and REST APIs. Advanced user of AI coding agents — notably Claude — to generate, understand, refactor, debug, and optimize code, with disciplined prompt engineering and systematic review of AI-generated code before it reaches production. Deep cross-platform mobile experience (Flutter) directly transferable to React Native. Self-driven, curious, and quick to pick up new stacks. Consistent track record of measurable impact: 95% reduction in fraud through a KYC integration, ~40% faster delivery of React/Next.js features, 50%+ reduction in bundle size, and 100% elimination of app-store resubmission delays via OTA updates.

TECHNICAL SKILLS

Languages: JavaScript · TypeScript · PHP · Python · Java · Dart

Frameworks & Libraries: Node.js (Fastify · Express.js · Hono.js) · React.js · Next.js · Flutter · Laravel · Flask

AI Agents & LLMs: Claude Agent / Claude Code · Gemini Agent (Google AI) · AI-assisted code generation, refactoring & debugging · Prompt engineering · Review and validation of AI-generated code · Multi-turn tool use

Web3 / Blockchain: Alchemy Web3 API · Reown AppKit · DeFi · Stablecoin contracts · Base Mainnet · Tokenomics

Databases: PostgreSQL · MySQL · Supabase · Firebase

DevOps & Tools: Git · GitHub · CI/CD · Docker · Docker Compose · Ngrok · Shorebird OTA · REST API · GraphQL · WebSockets · Pusher · Veriff KYC · shadcn/ui · Tailwind CSS

Methodologies: Agile / Scrum · Code Review · Cross-Platform Deployment

Machine Learning: Data collection & preprocessing · Data cleaning with Python (Pandas) · XGBoost · Model training & evaluation

PROFESSIONAL EXPERIENCE

Full-Stack Mobile & Web Developer · Cyber Bridge

July 2024 – Present

Sousse, Tunisia (Remote)

- Built 5+ Flutter Web3 mobile applications integrating blockchain wallet connectivity (Reown AppKit) and DeFi smart-contract interactions on Base Mainnet.
- Set up a Shorebird OTA update pipeline, cutting the release cycle from 3–5 days (app-store review) to under 1 hour — a 100% reduction in deployment lead time.
- Designed scalable REST/WebSocket backend services with Fastify + TypeScript, handling real-time data for 100+ concurrent active users.
- Implemented Veriff KYC API integration for a crypto trading platform, reducing fraudulent account creation by 95%.
- Developed Next.js web platforms and reusable React component libraries, speeding up delivery of new features by ~40%.
- Used Claude (AI coding agent / Claude Code) daily across existing TypeScript/React/Node.js projects to generate, refactor, and debug code, with systematic verification and testing before merge.
- Managed end-to-end App Store and Google Play release pipelines for 4+ applications.
- Collected and processed data and trained machine learning models (XGBoost) for internal analytics, including Python-based data cleaning and preprocessing pipelines.

Web Developer (Freelance) · Nexans Autoelectric

May 2024 – June 2024

Monastir, Tunisia (On-site)

- Delivered a secure internal HR and accounting management system in Laravel + SQL Server within a 2-week timeline.
- Implemented role-based access control (RBAC) protecting sensitive payroll and HR data for 100+ employees.

Mobile Developer (Internship) · SARTEX Group

Feb. 2024 – June 2024

Monastir, Tunisia (On-site)

- Led development of an industrial mobile app for automatic textile-machine balancing, reducing unplanned downtime through real-time fault alerts.
- Designed a reusable Flutter component library (30+ components), cutting UI development time by ~35% for future enterprise features.

Web Developer (Freelance) · Esso France

Feb. 2023 – Oct. 2025

Remote

- Designed and maintained a multi-module Laravel platform managing operations for multiple gas stations, processing 100+ daily transactions.
- Developed real-time cash-flow tracking and automated shift-scheduling modules, replacing manual spreadsheets and saving ~10 hours/week of administrative work.
- Deployed and maintained the application on IONOS; sustained 99.9% uptime over a 2+ year engagement.

Web Developer (Internship) · Halber

June 2022 – Aug. 2023

Monastir, Tunisia (On-site)

- 2023 — Delivered a full invoicing and product management application with RBAC and real-time notifications (Laravel, MySQL, Pusher), used by 3 internal teams.
- 2022 — Designed JOBIFY, a job-search platform built with React.js, GraphQL, and Laravel, with real-time WebSocket messaging between candidates and recruiters.

SELECTED PROJECTS

TradeUp AI — Crypto Trading Platform | Full-Stack Engineer

- Cut fraudulent accounts by 95% via Veriff KYC API integration; integrated a Gemini AI agent for real-time trading analytics and anomaly alerts; used Claude to accelerate backend development and code refactoring.
- Migrated the mobile app to a Next.js web platform with unified cross-platform authentication, expanding user reach without duplicating code.

Sar StableCoin — DeFi Mobile App | Flutter Engineer

- Designed and built an end-to-end stablecoin app executing tokenomics functions (mint, transfer, burn) on Base Mainnet via the Alchemy Web3 API.

MoveUP — Move-to-Earn Fitness App | Flutter & Backend Engineer

- Achieved 99% step-count accuracy by integrating Apple Health and pedometer APIs; users earn tokens/NFTs for daily activity.
- Integrated Shorebird OTA, enabling bug fixes and feature releases without app-store resubmission delays.

PeakChain Mobility | Flutter Engineer

- Translated Adobe XD mockups into a 60 FPS Flutter interface; cut total bundle size by 50%+ through asset optimization and tree-shaking.

VerwaltGenie — SaaS Management Platform (verwaltgenie.de) | Full-Stack Engineer

- Property-management and utility-cost billing SaaS for landlords and property managers in Germany, featuring a tenant portal, document vault, and multi-tenant Postgres row-level-security architecture.
- Built an Angular front end on a Fastify monorepo backend, developed from the ground up with Claude AI as the primary coding agent; deployed on a German server via Docker, with Ngrok for tunnelling (May 2026 – July 2026).
- Developed and published the companion Flutter mobile app on both the Apple App Store and Google Play.

EDUCATION

Computer Engineering

2021 – 2024

École Polytechnique de Sousse, Tunisia

Bachelor's Degree in Management Information Systems

2018 – 2021

Institut Supérieur de Gestion de Sousse, Tunisia

CERTIFICATIONS

- Flutter and Dart: Developing iOS, Android, and Mobile Apps — IBM (Feb. 2026)
- EF SET English Certificate — B2 Upper Intermediate (May 2025)
- TOEIC English Exam — B1 (Nov. 2023)

LANGUAGES

Arabic (Native) French (Full Professional Proficiency) English (Full Professional Proficiency — B2)
